Vibal Educational Service Program Professional development and continuing education

- Vibal ESP
- 21st Century Education
- K-12 Program

For over two decades now, Vibal Educational Service Program (ESP) has been a dependable teacher-training program aimed at helping educators and administrators meet the increasing demands and challenges posed by their profession.

For Vibal, it is a means by which the company could contribute to the uplifting of the quality of education in the country more than just being an after-sales service. Today, the ESP has evolved to become a full-scale teacher

21st Century Education

Engaging the 21st Century Learner

- Vibal ESP
- 21st Century Education
- K-12 Program
- UbD Framework

The 21st century education breaks the mold. It is flexible, creative, challenging, dynamic and complex. It must address a rapidly changing world filled with exciting new challenges and possibilities. 21st century learners need 21st century teachers! But how well do we really know and understand 21st century learners? Understanding, engaging and educating these 21st century learners would mean using the tools that a 21st century learner has.

Given the technology, pedagogy of student-centered learning, the required 21st century skills and literacies needed of a learner, and the

Surveys of business people report that high school and college graduates enter the workforce without needed skills, especially the ability to think creatively, to work in teams, and to show ingenuity.

About the Foundation

As the leading educational publisher in the Philippines, [Vibal Publishing House](#) feels the growing demand for effective education and high-quality information in the global knowledge economy. [Vibal Foundation](#) extends this commitment and responsibility by focusing on the same thing Vibal Publishing House does—education in the broadest sense of the word.

We aim to make a difference by promoting literacy (both print and digital), learning, cultural awareness and preservation, and great teaching. We do this by collaborating with leading businesses, civic organizations, and other non-profits to increase and diffuse knowledge; share good practice; foster innovation; and find workable solutions to the educational

What is E-turo?

E-turo, a play on the words 'electronic' and 'turo' (meaning teach) is a network of free and open educational resources. Filipino teachers and learners can share and customize E-turo content for their own use. E-turo covers basic education, alternative education, and continuing education.

We are focusing initially on developing an online repository for basic education in the areas of Mathematics, Science, English, Filipino and Social Studies. We want E-turo to attract everyone from educators, students and parents, to publishers, programmers, instructional designers, authors and public officials throughout the Philippines to contribute or freely access quality learning materials.

[Top]

What sort of resources does E-turo contain?

E-turo has three levels of content: (1) curricula and learning strategies; (2) lesson plans; (3) enrichment exercises. Users of E-turo can mix and match content according to their needs.

[Top]

Why was E-turo started?

According to the 2006 World Report, the population of the Philippines has been doubled to 91 million over the past 50 years by the highest birth rate in Asia. About 30 million of the population are below the age of 15. There are roughly 1 million preschool children (age 0-4); 13 million children in primary school (age 5-11); and 7 million children in secondary school.

The rapidly growing population of the Philippines means that there has to be drastic solutions on how to propagate education just as rapidly. Philippine education is marked by a scarcity of educational materials. Despite its best efforts, the government is unable to cope with the demands of students. Vibal Foundation aims to propagate abundance both of instructional media and technology, with the help of partners and volunteers, through E-turo.org.

E-turo will make learning possible for anyone, anywhere. This will drive personal growth and give opportunity to those who wouldn't otherwise have it. Perhaps, this exposure to education will even reveal the children who could solve some of our biggest problems of tomorrow.

VIBAL eTEXTBOOK FEATURES

The screenshot displays the VIBAL eTextbook interface on a tablet. At the top, the status bar shows 'No SIM', '10:24 AM', and 'Not Charging'. Below this, the navigation bar includes 'BACK TO LIBRARY', 'Lesson 8: Melody - Contour and Range', and 'A- A+' with a bookmark icon. The main content area is titled 'Tonal Movement and Shape' and contains a paragraph explaining melodic movement. Below the text is an audio player for 'ATIN CU PUNG SINGSING' with a progress bar. The audio player is followed by a section titled 'Folk Song from Pampanga' with source and arrangement information. Below this is a musical score for 'Atin Cu Pung Singsing' with lyrics in Tagalog. The score consists of four staves: the first three are vocal lines and the fourth is a piano accompaniment line. The lyrics are: 'A-tin cu pung sítg sítg Mo-sang yang tin tin tin can A-oo - oo tin i - o sang sa - dang i tin tin Sang-cao sang si - si - sap Oang mo - sang i ca tin Mo-oo - hi yo i - i E-cu cu oo - hi - yo'. Below the score is a paragraph explaining skips in folk songs, followed by an audio player for 'MAGTANIM AY DI BIRO (EXCERPT)'. The interface also shows a home button at the bottom center of the tablet.

No SIM 10:24 AM Not Charging

BACK TO LIBRARY Lesson 8: Melody - Contour and Range A- A+

Tonal Movement and Shape

Melodies move in different directions. Some notes may move upward in an ascending line or go downward in a descending line. There are also melodies that remain static or steady/unchanged. In some instances, some notes move up and down in an arch-like or wave-like shape. This characteristic of melody is called the contour or the shape of a melody. These varied melodic directions or contours are observed in our traditional music or **folk songs**.

"**Atin Cu Pung Singsing**" is an example of a folk song with notes that move by steps or just close to one another. This is clearly observed in measures 4, 6, and 8.

ATIN CU PUNG SINGSING

0:00 0:20

Folk Song from Pampanga

Source: Adapted from Pampanga Folk Songs
Arranged by: Norman Mahinay

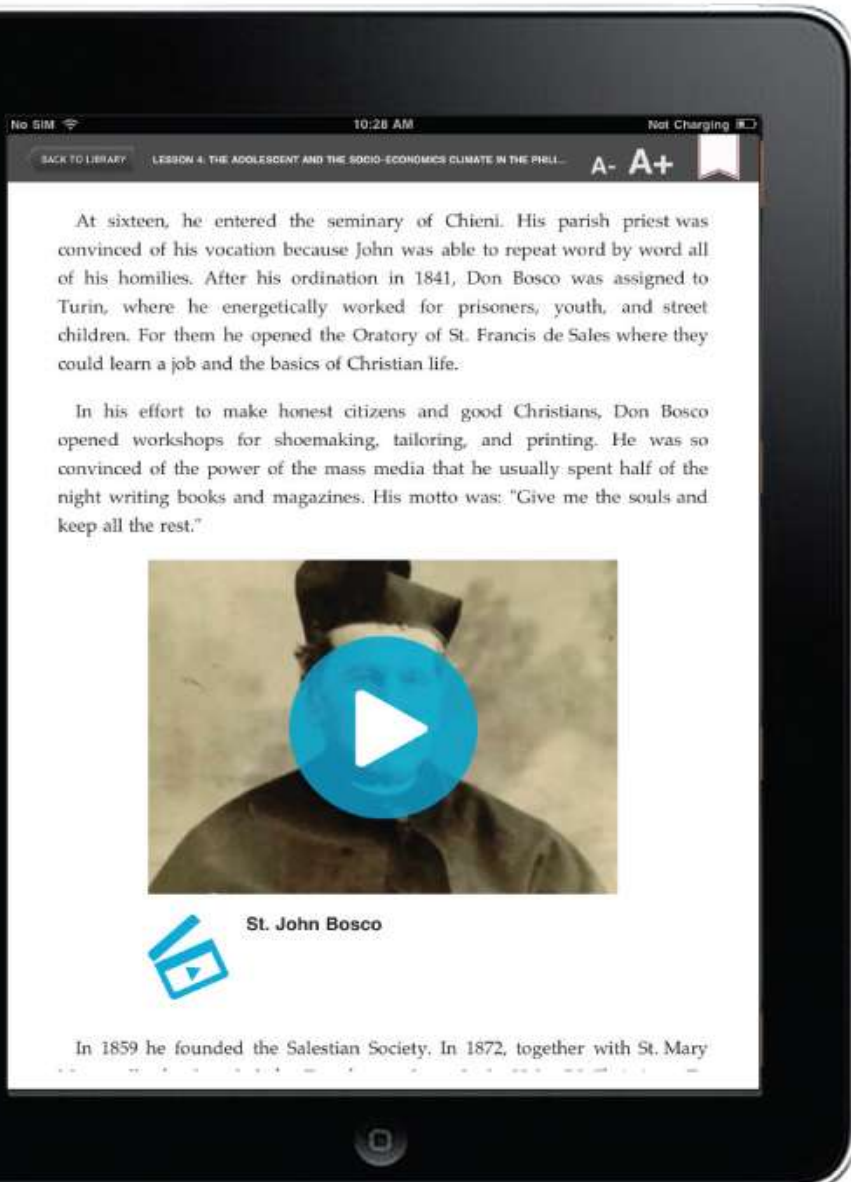

A-tin cu pung sítg sítg Mo-sang yang tin tin tin
can A-oo - oo tin i - o sang sa - dang i tin
tin Sang-cao sang si - si - sap Oang mo - sang i ca
tin Mo-oo - hi yo i - i E-cu cu oo - hi - yo

There are folk songs that have notes that move slightly distant from one another or in **skips**. This kind of tonal movement is observed in the song, "**Magtanim Ay Di Biro**", a folk song from the **Tagalog** region.

More than just having fun, playing games is an effective way to stimulate and sharpen minds. Vibal Digital Interactive Games (DIGs) challenge brainpower in a fun and entertaining way. Get your kids and students to try online DIGs here or download one from your favorite apps stores!

A Vibal knowledge app in the various subjects supports multiple modes of study: listening, viewing, reading and interacting. A knapp promotes independent learning—self-directed, goal-oriented, stimulating, and rewarding—a student will have more control over how he/she learns.

The Vibal Teaching-Learning System enables schools to provide and facilitate digital instructional resources and strategies. Complement any textbook in print or digital with your school subscription of Vibal TLS and give your teachers and students an edge in digital education.

The e-textbooks of Vibal are available from Vibe E-bookstore, the Philippines' first electronic bookstore. Enhanced with media-rich content, interactive drills, self-scoring quizzes, glossary and web support, Vibal e-textbooks provide new learning experiences.

What is Brainhub?

Brainhub is a virtual repository of digital curriculum content—multimedia, interactive drills, modules, and assessments.

As a learning management system (LMS), BrainHub enables educators to select and deliver digital educational resources. Best of all, BrainHub presents options for managing results of teaching and learning events within the facility.

For educators or schools keen on making a difference in teaching and learning today, BrainHub offers an assortment of standards-based digital content whether used inside or outside of the classroom.

As an online and cloud-based facility, BrainHub can be accessed via usual Internet connection in schools, homes, internet cafes or just about anywhere, wirelessly.

Brainhub with Vibal Textbooks

BrainHub is the repository and learning management facility behind the complementary electronic content for Vibal textbooks whether print or digital. These enrichment and assessment materials are indexed with the content of Vibal textbooks.

For easy access, students log in to i-learn.vibalpublishing.com, the Vibal digital hub for students while teachers log in to i-teach.vibalpublishing.com, the Vibal instructional hub for teachers.

BrainHub is linked to the I-Teach portal for teachers to select and assign e-learning content beyond has been curated vis-a-vis content of Vibal textbooks. From their BrainHub dashboard linked to I-Learn, students are notified and receive enrichments, assignments and tests.

Brainhub as a Stand-alone Facility

The resources in BrainHub are aligned to the curriculum standards prescribed by the Department of Education (DepEd). The syllabi of major educational institutions were also considered in the content development. As such, BrainHub can be adopted to supplement textbooks other than those published by Vibal Publishing.

Tracking students' progress at home has never been easier.

Teachers

Promote classroom activities, course expectations and assessment without adding to your workload. Design thematic units using reusable learning objects and prescriptive activities for varied groups of students.

[CONTINUE](#)

Never knew feedback from my teachers could reach us this quickly—at home.

Students

Build skills faster by extending your learning environment. Practice learning objects, view documents, watch videos, try out exercises, and get assessments all in one easy-to-use system.

[CONTINUE](#)

The numbers and figures gathered for us gave us a bigger picture of our school.

Administrators

VITALS works effectively as an institutional management tool—an information system that administers instructor-led e-learning courses all while keeping track of student progress.
